## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. **Claims 1-27,44** are drawn to the structure of an echo canceller, classified in Class 379, subclass 406.01.
  - II. **Claims 28-43** are drawn to the structure of a device with voice control of the transmission direction, classified in Class 379, subclass 388.04.
  - III. **Claim 45** is drawn to the structure of a communications device with an ultrasonic link, classified in Class 379, subclass 56.1.

The inventions are distinct each from the other because of the following reasons:

2. Inventions I and II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. See MPEP § 806.05(d). In the instant case, invention I is an echo cancelling system for a bidirectional transducer, invention II is a communication device comprising non duplex operation (transmission direction switching), and invention III is an ultrasonic link in a communications device.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander Jamal whose telephone number is 571-272-7498. The examiner can normally be reached on M-F 9AM-6PM.
